When did they made it?

- In record world first printing press was in 8th century from korea country call Kingdom of Shilla.
- World first printing press is from Korea country call Korye.
- First European Golden printing press was 1436 from Germany by Johann Gutenberg.

Why did they made it?

- People invented printing press because it was too hard to copy all the words with their hands.
- You could save times because printing press is way faster than human are writing.
- Before printing press invented people wrote bible with their hands but after printing press invented more people could get their own bible.

How did it work?

- Before metal printing press invented people made letter on the wood and put paper on the wood.
- Metal printing press is working like this you stamp letter on the metal that's how to make letters after that you put paper on metal and give pressure to make ink is on the paper.

How was life before it was introduced?

- They could write everything with hands. (probably the first copies of writing were made by engraving symbols on a slab of rock)
- People had to write books with their hand and book was really expensive to buy it.

Was it helpful?

- It was really helpful because many people could read more books.
- Book price got lower when printing press invented.
- Education developed a lot.

Timeline

8th
Century
Korea
made
world
1st
printing
press

1392
korea
made
world
first
metal
printing
press

1844:
Electroty
ping
invented.

1300 China
started to
